Education

St. Francis Institute of Technology

Bachelor of Engineering in Computer Engineering (CGPA: 8.0)

2022 – 2026

Mumbai, India

Shailendra Education Society

Higher Secondary Certificate (HSC) – 74%

2019 – 2021

Mumbai, India

Technical Skills

Languages: TypeScript, C#, Java, Python, SQL

Frontend: Angular, Next.js, Redux, Tailwind CSS, GSAP

Backend & APIs: Node.js, Express.js, JWT, RBAC, JDBC, Spring Boot

Databases & Caching: PostgreSQL, MySQL, SQLite, MongoDB, Redis

Cloud, DevOps & Tools: Microsoft Azure, AWS, Docker, Azure DevOps (ADO)

Core Competencies: Git, GitHub, CI/CD, MVC Architecture, Agile/Scrum

Experience

Stewart Title

Jun. 2026 – Sep. 2026

Full Stack Developer Intern

On site

- Engineered reusable, modular Angular UI components integrated with RESTful microservices for an enterprise payment platform.
- Architected and delivered an Angular-based proof-of-concept (POC) to streamline payment workflow automation.
- Implemented secure service-to-service authentication pipelines using C#/.NET and managed cloud deployments on Microsoft Azure.
- Refactored legacy codebases to remediate security vulnerabilities, improve code reusability, and reduce technical debt using AI tools like Claude Skills and Claude Code.
- Collaborated in an Azure DevOps (ADO) Agile environment, actively participating in sprint planning, code reviews, and CI/CD operations.

SDAC Infotech

Aug. 2024 – Jan. 2025

Software Developer Intern

Mumbai, India

- Developed 3+ enterprise CRM admin modules utilizing Java Full Stack and MVC architecture to support mission-critical workflows.
- Designed and optimized a 15+ table normalized relational database schema in MySQL with strategic indexing.
- Architected Role-Based Access Control (RBAC) REST APIs, reducing system query processing overhead by ~75%.

Projects

Trustlens AI | Node.js, TypeScript, PostgreSQL, Redis, Docker

2026

- A real-time log-monitoring and anomaly detection platform with automated alert mechanisms.
- Uses a high-throughput event pipeline using Redis Streams, processing thousands of log events with minimal latency.
- Containerized application services using Docker to ensure environment parity and reproducible deployments.

Travex | React.js, Node.js, Express, PostgreSQL, REST APIs

2026

- Built a centralized visit and reimbursement management platform, digitizing manual email workflows.
- Designed end-to-end scalable system architecture, relational schemas, and authenticated RESTful endpoints for approval tracking.

Task Flow | Node.js, React.js, MongoDB, JWT, Critical-Path Method

Dec. 2025 – Present

- Engineered a project scheduling platform featuring interactive milestone tracking and automated dependency mapping.
- Implemented JWT-based Role-Based Access Control (RBAC) and integrated critical-path analysis algorithms.

PESCA | React.js, Redux, GSAP, Data Structures & Algorithms

Jan. 2025 – Present

- Developed an interactive DSA learning application featuring 30+ dynamic algorithm visualizations rendered via GSAP.
- Integrated an in-browser real-time code editor and markdown note-taking workspace with centralized Redux state management.

Certifications

AWS Certified Cloud Practitioner Essentials – Amazon Web Services (Cloud Architecture, Security, Cost Optimization)
